

Section 7 of the Watershed Plan: Watershed Implementation Plan – Other Partners and Stakeholders

Protecting, restoring and enhancing watershed health requires the cooperation of all impacted stakeholders. Every person has an impact on the environmental, social and economic health of the watershed through their everyday lives and actions.

Strategic Priorities for Stakeholder Enhancement of Watershed Health

There are some fundamental strategic priorities to help guide stakeholder participation for improving watershed health. A fundamental value that underlies all strategic priorities is to start the learning at as young an age as possible. Children have an immense capacity to create changes when they develop an understanding of their connections, contributions and impacts on their environment.

1. Active Engagement and Participation
2. Continuous Learning and Increasing Awareness
3. Information and Data Sharing
4. Partnering and Coordination of Resources
5. Responsible Land and Resource Stewardship Practices

How to Get Involved

Any stakeholder idea, suggestion or plan to help achieve watershed health, will be considered and supported if possible. All stakeholders that would like to become involved or more involved in protecting the watershed should visit our website and/or contact or visit CLOCA's office and speak to reception for direction to the most appropriate person and department to investigate how we can work together. We very much look forward to working with our existing partners as well as any new stakeholders who would like to contribute to watershed health.
